## WHAT WE DOCUMENT

### Roof & exterior documentation

Top-down and oblique views of roofs, facades, access points, visible damage, equipment, drains, and hard-to-reach exterior areas.

### Solar asset documentation

Rooftop or ground-mounted solar records for layout, installation progress, service context, warranty conversations, and optional separately scoped thermal capture.

### Construction progress

Repeatable site captures, dated milestones, staging areas, access, logistics context, and stakeholder-ready progress records.

### Commercial property record

Exterior, roofline, parking, loading, access, perimeter, facade, and site-context documentation for property and facility teams.

### Land & acreage overview

Broad property context, access roads, vegetation, structures, fields, terrain, and repeatable baseline records for landowners and operators.

### 360 / 3D-ready delivery

360 viewpoints, short walkthrough-style media, model-ready capture, and supported third-party embeds when richer spatial review is useful.

## WHY SOLVD AIR

### Licensed & insured

FAA Part 107 operator. \$2M liability coverage, COI on request.

### Fast turnaround

Response within 24 hours, with records organized for quick review.

### Private by default

A clean, private record you can review online, download, print, or forward.

## HOW AN ASSIGNMENT BECOMES A USABLE RECORD

### 01 Brief

Confirm objective, access, exclusions, useful views, and deliverables before scheduling.

### 02 Review

Check airspace, site access, operating conditions, timing, and authorization requirements.

### 03 Capture

Fly the approved mission with wide context and focused priority views.

### 04 Organize

Date, group, label, and prepare approved assets so the record is easy to review.

### 05 Deliver

Send a private record or PDF-ready package for approved stakeholders.

## AREAS SERVED

- Los Angeles
- Orange County
- Inland Empire
- Ventura County
- Southern California by request

## DELIVERABLES

- Private project record
- Organized photo gallery
- Aerial video clips
- 360 or 3D embeds when scoped
- Annotated report or PDF summary
- Download-ready files
- Timeline or progress notes
- Invoice or payment reference when configured

## OPERATING STANDARDS

Airspace, site access, and authorization requirements are reviewed before scheduling.

Property access, intended use, privacy expectations, and distribution are confirmed before capture.

Adjacent properties and sensitive areas are treated as exclusions unless approved scope requires otherwise.

Certificate and insurance documentation can be provided to qualified clients on request.

## IMPORTANT LIMITATIONS

Drone deliverables are visual documentation unless otherwise stated.

They are not a substitute for licensed roofing, engineering, surveying, legal, insurance, agricultural, or emergency-service advice.

Survey-grade, thermal, diagnostic, engineering, or emergency-response outputs require separately confirmed equipment, authorization, scope, and qualified interpretation.

## Ready to document a property?

Send location and access details. We respond with scope and pricing.
